Winelands Full Day Tour

Allow us to take you on a breathtaking journey through the winelands of the Western Cape where you will see some of the most scenic landscapes in the country. Cape Dutch architecture, with distinctive gabled and thatched roofed farmsteads set amidst the vineyards and valleys with dramatic mountain backdrops combine to make these regions spectacularly picturesque.

The South African wine industry is steeped in history dating back to the French Huguenots, but today is a thriving growing trade which embraces modern wine making techniques while using traditional methods in a winning combination producing some of the finest wines in the world.

This one day trip will include a cellar tour, an enchanting meal in a well known wine estate and an exceptional wine tasting experience where you will be able to sample of the best of the Cape's wines.

For our own unique route through this historic region, IWC has handpicked some very special wineries, chosen not only for their splendid vintages, but for their forward-thinking attitude towards the ecological challenges of wine-farming in the New South Africa. We will learn about this labour of love as we taste their excellent wines.
